Ethical Hacking & Security Fundamentals

Hands-on Offensive Security, Penetration Testing & Lab Assessments

TRACK / DISCIPLINE	TOTAL DURATION	DELIVERY MODE	CERTIFICATION
Cyber Security	12 Weeks (55h Live Labs)	Live Online & Virtual Pen-Testing Labs	Verified Credential

1. EXECUTIVE PROGRAM OVERVIEW

A hands-on, practical entry point into ethical hacking and offensive security. Build essential foundations in networking and Linux, then work through structured reconnaissance, vulnerability scanning, system exploitation, and penetration testing in controlled, ethical lab environments.

TOOLS & TECHNOLOGIES STACK:

KALI LINUX | WIRESHARK | NMAP | BURP SUITE | METASPLOIT | OWASP ZAP | HYDRA | JOHN THE RIPPER | AIRCRACK-NG

2. MODULAR SYLLABUS BREAKDOWN

MODULE 01 Ethical Hacking Foundations & Reconnaissance — 2 Weeks

- Legal frameworks, scope of engagement, and ethical codes of conduct
- Active reconnaissance: DNS zone transfers, ping sweeps, service detection
- Passive reconnaissance: OSINT, Google dorking, Shodan, WHOIS, DNS records

Lab Milestone: OSINT target profiling and perimeter reconnaissance report.

MODULE 02 Network Scanning, Enumeration & Vulnerability Mapping — 3 Weeks

- Nmap advanced scanning techniques, timing templates, and NSE scripts
- Vulnerability research, Exploit-DB, and CVE mapping
- SMB, SNMP, NetBIOS, and SMTP service enumeration

Lab Milestone: Discovered and mapped exposed ports and vulnerable services across a test subnet.

MODULE 03 System Exploitation & Metasploit Framework — 3 Weeks

- Metasploit architecture: Exploits, Payloads, Encoders, Auxiliary modules
- Post-exploitation: Privilege escalation, hash dumping, and persistence
- Remote code execution, client-side attacks, and social engineering

Lab Milestone: Gained root access on a test machine, extracted password hashes, and documented findings.

MODULE 04 **Web App Penetration Testing & Reporting** 4 Weeks

- Web vulnerability discovery with Burp Suite and OWASP ZAP
- Testing for SQL injection, cross-site scripting, and broken authentication
- Drafting professional, executive-ready remediation and penetration test reports
- Mock technical security interviews and career mentoring

Lab Milestone: Completed full black-box penetration test against a multi-tier target and presented remediation findings.

3. REAL-WORLD PORTFOLIO PROJECTS

Full-Scope Black-Box Penetration Testing Project

Executed complete reconnaissance, scanning, vulnerability identification, exploitation, and compiled a corporate executive remediation report.

AUTHORIZED INDUSTRY CERTIFICATION & CAREER SUPPORT

Graduates receive a verified credential shareable on LinkedIn, plus complete resume review, mock interviews, and corporate referrals.
